Subject: RE: Sandhills wireless in Huawei unit

Thank you very much for this. I am currently in contact with our Washington counsel regarding this issue. We will be taking action on this with Sandhills as well as Bai Cell.

Josh,

This is what we found.
It is Sandhills Wireless that is using your MCCMNC
They are running Baicells TDD LTE. Baicells should not be telling clients to use your information.
Sandhills should shut down until they have their own MCCMNC. They say they are registered to operate in the 365 band but we don't see it in the FCC data base.
I may bring this up with the GSMA group.

The picture below is our modem using our SIM. We could not connect to it but we could see it.

Jeff
Here is better results of that PLMN. Also I found something interesting on Bai Cell's website.
